HOW TO PLAY

BACCARAT

THE FOLLOWING IS A SUMMARY OF THE GAME RULES

Baccarat is an elegant casino game that has been made world famous in the great casinos of Europe. The game is even more famous for the high stakes and high adventure portrayed in countless novels and movies. Baccarat is played on the Main Gaming Floor and in the Private Gaming Rooms.

THE AIM OF THE GAME

Baccarat is a game of chance, there are only two hands in Baccarat – the Banker's and the Player's. There are no individual hands for players. These "community hands" are the focus for all players. You are therefore not playing against the other players or the House, you are simply betting against the cards. Two cards are dealt to both the Player's hand and the Banker's hand, then depending on the totals of those two cards, a third card may be dealt to either or each hand.

In Baccarat, the highest count possible is nine. All cards from Two to Nine are counted at face value, Aces are counted as one and Tens and face (picture) cards are counted as zero. The aim of the game is to bet on the hand that you believe will total closest to nine. See our examples of Baccarat hands for an illustration.

HOW THE HANDS ARE PLAYED

To commence the game, all players place their bets on any of the betting areas on the layout. Once the bets are placed, two cards are dealt to both the Player's and the Banker's hands.

If a hand's first two cards total eight or nine, it is considered a "Natural" and no more cards are dealt. A third and final card may be dealt, depending on the combined value of the first two cards. Third cards are dealt first to the Player's hand then to the Banker's hand if required. These totals are read as if the first digit does not exist – so a hand totaling 15 becomes 5.

The dealer calls every play in Baccarat, in accordance with the following tables of play. Both the Banker's and Player's hands must draw according to these fixed rules. There are no options regarding drawing the third card for either the Banker's or the Player's hand.

WINNING BET PAYOUTS

Winning bets placed on the Player's hand are paid even money. Winning bets placed on the Banker's hand are paid even money, less a 5% House commission. You may also bet that the result will be a draw or tie. When a tie results, tie bets are paid eight to one; other bets neither win nor lose.

PLAYER'S HAND

TOTAL OF FIRST TWO CARDS	OUTCOME
0, 1, 2, 3, 4, 5	Draws a third card unless the Banker hand has a "Natural"
6, 7	Stands
8, 9	"Natural" - Stands

BANKER'S HAND

When the first two cards total zero, one or two, the Banker's hand draws a card. When the total of the Banker's first two cards is three or more, the outcome depends on the third card drawn to the Player, as detailed below.

TOTAL OF FIRST TWO CARDS	DRAWS A CARD WHEN PLAYER'S THIRD CARD IS:	STANDS WHEN PLAYER'S THIRD CARD IS:
3	0-1-2-3-4 5-6-7-9	8
4	2-3-4-5-6-7	0-1-8-9
5	4-5-6-7	0-1-2 3-8-9
6	6-7	0-1-2-3 4-5-8-9
7	Stands	
8-9	"Natural" - Stands
