

HOW TO PLAY

BLACKJACK

THE FOLLOWING IS A SUMMARY OF THE GAME RULES

Blackjack is one of the most popular casino games. The object of the game is to draw cards with a total closer to 21 than the dealers total – without going over 21. Cards are dealt clockwise from a dealing device called a shoe or from a shuffling machine. You are dealt two cards, while the dealer takes one card. The cards are dealt face – up so you can see your point value. Blackjack is played with 3, 4, 6 or 8 decks of cards.

HOW TO PLAY

Picture cards (Jack, Queen and King) count as 10, Aces count as 1 or 11, whichever is to your advantage e.g. Ace, 8, 10 = 19. Any other cards (2, 3, 4, 5, 6, 7, 8, 9, 10) count as face value.

If your first two cards are an Ace AND any ten-point card, you have Blackjack. The dealer will announce “Blackjack” and pay you at odds of 3 to 2. In the event that the dealer also has a Blackjack. The hand will be a stand-off (a tie or a draw) and you will neither win nor lose. However, if the dealer makes any other total including 21 with three or more cards, your Blackjack will win.

If you do not have Blackjack on your first two cards, you may need to stand (draw no more cards) or hit (draw more cards) until you decide to stand, or until your point total goes over 21 in which case you lose. You must hit if the point total of your cards is 11 or less. Irrespective of your point totals, the dealer must hit with 16 or less and stand with 17 or more. If the dealer goes over 21, all hands remaining on the table must be paid.

If you finish with a total closer to 21 than the dealer's total, you will win and be paid even money. If you and the dealer have the same totals you have a stand-off.

In the event that the dealer has a Blackjack, you lose unless you also have a Blackjack, in which case you have a stand-off. In the game of Blackjack, you can place a bet on a box (playing area) or behind another player's bet. Up to three players may bet on one box, provided that the total of all bets remains within the maximum limits displayed on the table sign.

PERFECT PAIRS

Perfect Pairs – Perfect Pairs™ is an optional side bet offered on certain Blackjack tables. The concept of the bet is simple. A Perfect Pairs™ bet wins if the first two cards dealt to a Blackjack hand are a pair and loses if they are not a pair. A Perfect Pairs™ bet is made prior to the initial deal. There are three different types of pairs and the payout odds vary accordingly.

To play Perfect Pairs™ simply place a bet in the Perfect Pairs™ area in front of the Blackjack box - you are not required to make an initial wager on the Blackjack hand, but there must be at least one regular Blackjack bet placed on the Blackjack box before a Perfect Pairs™ wager can be made and the cards drawn to that hand.

A maximum of three Perfect Pairs™ wagers will be permitted per Blackjack box and preference will be given to players who have also placed a wager on the Blackjack hand for that box.

MIXED PAIR (A)

PAYS 5 TO 1

Two cards of the same number or picture type but of different colours eg: Queen of Hearts and Queen of Spades

COLOURED PAIR (B)

PAYS 10 TO 1

Two cards of the same number or picture type and colour but of different suits eg: Queen of Hearts and Queen of Diamonds

PERFECT PAIR (C)

PAYS 30 TO 1

Two cards of the same number or picture type and suit eg: Queen of Hearts and Queen of Hearts

Please note that the casino may limit the placement of Perfect Pairs™ wagers to those players who also have a Blackjack wager and will display a sign at the table when this applies.

All bets must be placed before any cards are dealt and you can only place one Perfect Pairs™ bet for each Blackjack hand in the round of play. If the first two cards dealt to the Blackjack hand are a pair, you win! For the purposes of playing Perfect Pairs™ a pair is a

Indicative table design

hand where the first two cards dealt, in the initial deal only, are either:

Mixed Pair (A)

Coloured Pair (B)

Perfect Pair (C)

Splitting Pairs – If your first two cards have the same point value, you may ask the dealer to split your hand to form two separate hands, by betting an amount equal to the original bet. Each hand will be played and completed in turn. At least one card will be dealt to each hand. If the first two cards dealt to a split hand total 9, 10, or 11 you may also double. If you split Aces, only one card is dealt to each Ace. If a 10-point card is dealt to either Ace, the hand is treated as 21, not Blackjack.

Doubling – You may double your original bet if your first two cards total 9, 10, or 11, but if one of the first 2 cards is an ACE, it will only be counted as a one towards your final total. If you elect to double, you place an additional bet of not more than the original bet. You will then receive an additional card on that hand.

Insurance – An insurance bet may be made by placing an amount not more than half of your original bet, on the Insurances line of the table layout. All insurance bets must be placed prior to any players receiving a third card.

Whenever the first card dealt to the dealer is an Ace, the dealer will announce “insurance” and you may make an insurance bet in case the dealer makes Blackjack.

This insurance bet will only win if the dealer makes Blackjack with the second card being a 10 value card and is paid at odds of 2 to 1.

Blackjack – In the event that the dealer receives Blackjack and you have placed additional bets on split hands and/or a double, the dealer will only take an amount equal to your original bet from the remaining bets in each box.

In the event that you have Blackjack and the dealer does not have an Ace or tenpoint card as the first face - up card, the dealer will pay your Blackjack bet at odds of 3 to 2 and remove your cards prior to any players receiving a third card. If the dealers face up card is an Ace or tenpoint card, the game will be dealt in the usual fashion, with all the bets paid and taken after the dealer’s hand has been completed.

IMPORTANT

You may not handle, remove or alter any cards used in the game of Blackjack Challenge. Although the dealer will call out the card totals, it is your responsibility to also check your point totals are correct.

See table games staff for further information on how to play.

Think! About your choices.
